Originality

The author does a very good job of taking an interesting, relevant position and presenting it clearly. The selection of key attributes on which to focus is slightly unusual and all the better for it since it is carried off well.

Rigour

The entire piece is tightly constructed and is well focused on topic. References are appropriate in terms of both topic and venue of publication. There are however rather too few of them, even for a relatively short piece such as this.

Clarity

The essay is very well structured and clearly presented. It is perhaps a little unbalanced, for example in its relative coverage of the keyboard and the visual display respectively (Sections 2 and 3).

Significance

The essay presents its position well and in particular makes some good points around bandwidth. Within the constraints of this short piece, it says some interesting things and supports them well.
